The Comparative Political Data Set 1960-2014 (CPDS) is a collection of political and institutional data which have been assembled in the context of the research projects “Die Handlungsspielräume des Nationalstaates” and “Critical junctures. An international comparison” directed by Klaus Armingeon and funded by the Swiss National Science Foundation. This data set consists of (mostly) annual data for 36 democratic OECD and/or EU-member countries for the period of 1960 to 2014. In all countries, political data were collected only for the democratic periods.\(^1\) The data set is suited for cross-national, longitudinal and pooled time-series analyses.

The present data set combines and replaces the earlier versions “Comparative Political Data Set I” (data for 23 OECD countries from 1960 onwards) and the “Comparative Political Data Set III” (data for 36 OECD and/or EU member states from 1990 onwards). A variable has been added to identify former CPDS I countries.

For additional detailed information on the composition of government in the 36 countries, please consult the “Supplement to the Comparative Political Data Set – Government Composition 1960-2014”, available on the CPDS website.

The Comparative Political Data Set contains some additional demographic, socio- and economic variables. However, these variables are not the major concern of the project and are thus limited in scope. For more in-depth sources of these data, see the online databases of the OECD, Eurostat or AMECO.

When using data from this data set, please quote both the data set and, where appropriate, the original source. Please quote this data set as:

**Last updated: 2016-08-22**

\(^1\) Political data are not collected for non-democratic periods and thus missing for Greece during the period 1968-1973; for Portugal until 1975; Spain until 1976; Bulgaria, Czech Republic, Hungary, Romania and Slovakia until 1989; Poland until 1990; Estonia and Lithuania until 1991; Latvia and Slovenia until 1992; and missing for Croatia until 1999. Political data collection in Malta starts in 1966 after its independence in 1964. In the case of Cyprus it starts in 1976 after its division in 1974.
1. General variables

- **year**
  - Year of observation

- **country**
  - Country names

- **countryn**
  - Country code numbers: 1 Australia, 2 Austria, 3 Belgium, 4 Bulgaria, 5 Canada, 6 Croatia, 7 Cyprus (Greek part), 8 Czech Republic, 9 Denmark, 10 Estonia, 11 Finland, 12 France, 13 Germany, 14 Greece, 15 Hungary, 16 Iceland, 17 Ireland, 18 Italy, 19 Japan, 20 Latvia, 21 Lithuania, 22 Luxembourg, 23 Malta, 24 Netherlands, 25 New Zealand, 26 Norway, 27 Poland, 28 Portugal, 29 Romania, 30 Slovakia, 31 Slovenia, 32 Spain, 33 Sweden, 34 Switzerland, 35 United Kingdom, 36 USA.

- **iso**
  - International Standard for country codes: ISO 3166-1 code (ALPHA-3).

- **iso3n**
  - International Standard for country codes: ISO 3166-1 numeric code (numeric-3).

- **cpds1**
  - Dummy variable with value 1 for former “Comparative Political Data Set I” countries, covering 23 OECD countries starting in 1960.

- **poco**
  - Dummy variable with value 1 for post-communist countries (Bulgaria, Croatia, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Romania, Slovakia, Slovenia).

- **eu**
  - Dummy variable with value 1 for member states of the European Union (since year of accession).

- **emu**
  - Dummy variable with value 1 for member states of the Economic and Monetary Union (EMU) of the European Union (since year of accession).

**Note:**

1. For former communist countries, as well as for Greece, Portugal and Spain, political data were gathered starting with the first free elections. For Cyprus, data begin with the first election after its division. For Malta, political data were gathered starting with the first election after its independence.

2. Germany: Data up to the end of 1990 are for the Federal Republic of Germany before reunification only (West Germany); unless otherwise indicated, data cover all of Germany from 1991 onwards.
2. Governments

Note:
For detailed information on government data (party composition, reshuffles, duration, reason for termination and the type of government) please consult the “Supplement to the Comparative Political Data Set – Government Composition” available on the Comparative Political Data Set website.

gov_right1 Government composition: cabinet posts of right-wing parties in percentage of total cabinet posts. Weighted by the number of days in office in a given year. 
Missing: None.
Source: Own calculations primarily based on Schmidt and Beyer (1992); from 1991 on from the political data published in the European Journal of Political Research (Political Data Yearbook, various issues). For details see Appendix 1, for the classification of parties into “left”, “centre” or “right” parties see Appendix 2.

gov_cent1 Government composition: cabinet posts of centre parties in percentage of total cabinet posts. Weighted by the number of days in office in a given year. 
Missing: None.
Source: See variable ‘gov_right1’.

gov_left1 Government composition: cabinet posts of social democratic and other left parties in percentage of total cabinet posts. Weighted by the number of days in office in a given year. 
Missing: None.
Source: See variable ‘gov_right1’.

Notes:
1. Due to independents in government or non-partisan/technocratic governments, the calculations of ‘gov_right1’, ‘gov_cent1’ and ‘gov_left1’ do not always add up to 100 percent.
2. In countries where the democratic transition started later than in 1960, the calculations of government composition in the first year do not start on the 1st January. Instead, calculations start with the investiture date of the first democratic government. Thus the variables can still add up to 100 percent.

gov_party Cabinet composition (Schmidt-Index): (1) hegemony of right-wing (and centre) parties (gov_left1=0), (2) dominance of right-wing (and centre) parties (0<gov_left1<=33.33), (3) balance of power between left and right (33.33<gov_left1<66.67), (4) dominance of social-democratic and other left parties (66.67<=gov_left1<100), (5) hegemony of social-democratic and other left parties (gov_left=100).
Missing: Bulgaria 1993/94 and Italy 2012 (full technocratic governments).
Source: Own calculations according to Schmidt (1992).

Notes:
1. Where the sum of ‘gov_left’, ‘gov_cent’ and ‘gov_right’ is not equal to 100 percent due to independents, the boundaries for the three groups were recalculated for the codes (2), (3) and (4) by taking the sum of the given entries as 100 percent. For example, Portugal 2005:
gov_right + gov_cent + gov_left = 61.12.
The total of 61.12 percent is the basis for the calculation of the new boundaries. 
61.12/3 = 20.37 is in this case the new boundary for the lower third, replacing 33.3 percent. 20.37*2 = 40.75 would be the new boundary for the upper third, replacing
66.6 percent. As \( \text{gov}_{\text{left}} = 42.64 \), which is a higher value than the boundary for the upper third (=40.75), a (4) was entered.

</table>
percentage of the total parliamentary seat share of all governing parties. Weighted by the number of days in office in a given year. Period covered: 1960-2014. Missing: None. Source: See variable ‘gov_right1’.

Notes:
1. Changes in the composition of the parliament are not entered until there has been a change in government.
2. For some calculations the total weight does not amount to 100 percent due to non-partisan/technocratic governments in office.

Note:
1. Changes in the composition of the parliament are not entered until there has been a change in government.

gov_type Type of government based on the following classification:
(1) Single-party majority government: One party takes all governments seats and has a parliamentary majority [>50.0%].
(2) Minimal winning coalition: All participating coalition parties are necessary to form a majority government [>50.0%].
(3) Surplus coalition: Coalition governments which exceed the minimal-winning criterion [>50.0%].
(4) Single-party minority government: The party in government does not possess a majority in Parliament [≤50.0%].
(5) Multi-party minority government: The parties in government do not possess a majority in Parliament [≤50.0%].
(6) Caretaker government: Governments which should simply maintain the status quo.
(7) Technocratic government:

Led by technocratic prime minister, consists of a majority of technocratic ministers and is in possession of a mandate to change the status quo.

Missing: None.

Notes:
1. The indicator refers to the type of government that was in office for the longest period each year.
2. Caretaker governments are governments which should simply maintain the status quo (Goldner 2010: 4). Mostly the ministers of such governments, including the prime minister, belong to a specific party. However, in a few cases the governments consist of nonpartisan technocratic ministers. We still code these governments as caretaker governments as long as their mandate does not exceed the remit “to mind the shop”.
3. Based on McDonnell and Valbruzzi (2014: 11), we define a technocratic government as a government which is led by technocratic prime minister, consists of a majority of technocratic ministers and is in possession of a mandate to change the status quo. In a few cases, only the minority of ministers are technocrats. However, as long as the first and third criterion (technocratic prime minister and mandate to change the status quo) are fulfilled, we still code these governments as technocratic. Following McDonnell and Valbruzzi (2014: 4) we classify a prime minister as a being a technocrat if “at the time of his/her appointment to government, he/she: (1) has never held public office under the banner of a political party; (2) is not a formal member of any party; (3) is said to possess recognized non-party political expertise which is directly relevant to the role occupied in government” (McDonnell and Valbruzzi 2014: 4-5).
4. If a single party’s seat share is exactly 50%, we code the government as a single party minority government. If two governmental parties possess combined 50% of the seat share we code the government as a multi party minority government. If the government consists of three parties where the two biggest ones hold 50% of the seat share we code the government as a minimal winning coalition one.
5. Sister parties count as one party for the classification of the type of government (for example the CDU and CSU in Germany).
6. We classify the governments of Cyprus and the United States continuously as single party majority governments due to the countries’ presidential system.

3. Elections

elect Date of election of national parliament (lower house). (If there were two elections in a year, the date of the second is given).

Missing: None.

Source: European Journal of Political Research (Political Data Yearbook, various issues); Mackie & Rose (1991); Bugajski (2002); Keesing’s Archive; Parliaments and governments database (http://www.parlegov.org/explore); Parline database (http://www.ipu.org/parline-e/parlinesearch.asp).

Note:
1. For former communist countries the entries generally start with the year when the first free elections were held. An exception is the inclusion of the 1990 Slovenian elections.
Although at the time of these elections, Slovenia was still part of the Yugoslav federation, the significance of the decisions taken by the Parliament formed after these elections has led some authors to consider them “founding elections” (e.g. Klingemann et al. 2000). The elections of the Federal Assembly of Czechoslovakia 1990 and 1992 are included as well since the Czech and the Slovakian parts of the Federation voted separately for their own candidates. The 1992 elections produced the Parliaments which ruled after the two countries peacefully separated on 1st January 1993.

2. Greece 2012: From the two elections in 2012 (06. May and 17. June), only the results of the second one on 17. June are entered.

**vturn**  
Voter turnout in election.  
Missing: None.  
Source: See variable ‘elect’.

**social1**  
Share of votes of the party classified as ‘social1’.  
Missing: None.  
Source: See variable ‘elect’. Parties are classified based on Lane, McKay and Newton (1997). For details about the classification and the period covered for each country, see the Appendix 3.

**social2**  
Share of votes of the party classified as ‘social2’.  
Missing: None.  
Source: See variable ‘elect’. Parties are classified based on Lane, McKay and Newton (1997). For details about the classification and the period covered for each country, see the Appendix 3.

**ssocial1**  
Share of seats in parliament for the party classified as ‘social1’.  
Missing: None.  
Source: See variable ‘elect’. Parties are classified based on Lane, McKay and Newton (1997). For details about the classification and the period covered for each country, see the Appendix 3.

**ssocial2**  
Share of seats in parliament for the party classified as ‘social2’.  
Missing: None.  
Source: See variable ‘elect’. Parties are classified based on Lane, McKay and Newton (1997). For details about the classification and the period covered for each country, see the Appendix 3.

As a general rule, we include data on votes and seats for a party if it reached at least 2% of the vote share in an election. If it did not reach that threshold, data for this party was not entered for this election (neither on votes nor on seats); rather it received a zero (see Appendix 3).

Notes:  
1. For Italy (1993-2005), Germany, Lithuania and New Zealand (since 1994), the share of votes represents the share of votes received on party lists (proportional part of the electoral system). For the parallel system of Japan, the percentage of votes represents the mean of votes in single-seats districts and in proportional representation constituencies.

2. Slovenia 1996-2006: The National Assembly also includes two seats (one seat each) reserved for the Italian and Hungarian minorities (ethnic1 and ethnic2) that are only elected by members of those minorities.

3. ‘others’ and ‘sothers’ are residual categories. They cover the difference of entries on votes or seats of the sum of all other categories compared to 100 percent.

4. In bicameral systems, data is taken for the lower house.
threshold, data for this party was not entered for this election (neither on votes nor on seats); rather it received a zero (see Appendix 3).

**List of party family labels:**
- ssocial1-ssocial8
- sleftsoc1-sleftsoc5
- scomm1-scomm4
- sprotest1-sprotest5
- sgovernment
- sconserv1-sconserv6
- sreligion1-sreligion7
- sliberal1-sliberal8
- sprotest1-sprotest5
- sgreen1-sgreen3
- sethnic1-sethnic4
- sright1-sright5
- smonarch1
- sperson1
- spension1-spension2
- snonlbl1-snonlbl2
- salliance1-salliance3
- sothers

**Note:**
1. In bicameral systems, data is taken for the lower house.

womenpar Percentage of women in parliaments. Entries refer to the composition of the parliament at the end of the corresponding year.

**Period covered:** 1960-2014.

**Missing:** Czech Republic, Slovakia and Slovenia: 1990/91.

**Source:** Inter-Parliamentary Union (1995, 1997); Inter-Parliamentary Union Homepage (http://www.ipu.org/wmn-e/classif-arc.htm) (Downloaded: 2016-07-021).

**Note:**
1. In bicameral systems, data is taken for the lower house.
2. **Croatia 2003:** Data corresponds to the month of November.

### 4. Party system

**Note:**
1. For the calculation of party system indicators, the vote and seat shares of independents and very small parties grouped under the category 'others' were neglected. The construction of the indices is such that independents and very small parties tend to be ignored, because parties are weighted by their vote/seat shares (see also Lijphart 2012: 73, footnote 7).

rae_ele Index of *electoral* fractionalization of the party system according to the formula proposed by Rae (1968):

\[
rae_{\text{ele}} = 1 - \sum_{i=1}^{m} v_i^2, \text{ where } v_i \text{ is the share of votes for party } i \text{ and } m \text{ the number of parties (without the category 'others'). The index can take values between 1 (maximal fractionalization) and 0 (minimal fractionalization).}
\]

**Period covered:** 1960-2014.

**Missing:** None.

**Source:** Own calculations.

rae_leg Index of *legislative* fractionalization of the party system according to the formula proposed by Rae (1968):

\[
rae_{\text{leg}} = 1 - \sum_{i=1}^{m} s_i^2, \text{ where } s_i \text{ is the share of seats for party } i \text{ and } m \text{ the number of parties (without the category 'sothers'). The index can take values between 1 (maximal fractionalization) and 0 (minimal fractionalization).}
\]

**Period covered:** 1960-2014.

**Missing:** None.

**Source:** Own calculations.
**effpar_ele**  Effective number of parties on the votes level according to the formula $[N_2]$ proposed by Laakso and Taagepera (1979). The effective number of parties uses the same information as the Rae-Index and is calculated from this index as follows: $\text{effpar}_\text{ele} = 1 / (1 - \text{rae}_\text{ele})$

Missing: None.

Source: Own calculations.

**effpar_leg**  Effective number of parties on the seats level according to the formula $[N_2]$ proposed by Laakso and Taagepera (1979). The effective number of parties uses the same information as the Rae-Index and is calculated from this index as follows: $\text{effpar}_\text{leg} = 1 / (1 - \text{rae}_\text{leg})$

Missing: None.

Source: Own calculations.

**dis_abso**  Index of absolute disproportionality. For example, a score of 1 means that on the seats level there is, on average, one (effective) party less than on the votes level. ‘Absolute’ refers to the calculation of the differences between the effective number of parties in elections and parliaments without taking the fractionalization of the party system into account. The more fractionalized a party system, the greater the likelihood – ceteris paribus – of high values of dis_abso.

The index is calculated as follows:

$\text{dis}_\text{abso} = \text{effpar}_\text{ele} - \text{effpar}_\text{leg}$

Missing: None.

Source: Own calculations.

**dis_rel**  Index of relative disproportionality. This index is weighted by the total number of parties on the votes level. It is calculated as follows:

$\text{dis}_\text{rel} = (\text{effpar}_\text{ele} - \text{effpar}_\text{leg}) / \text{effpar}_\text{ele}$

Missing: None.

Source: Own calculations.

**dis_gall**  Index of disproportionality according to the formula [least squares] proposed by Gallagher (1991). Calculated as follows:

$$\text{dis}_\text{gall} = \sqrt{\frac{1}{2} \sum_{i=1}^{m} (v_i - s_i)^2}$$

where $v_i$ is the share of votes for party $i$, $s_i$ is the share of seats for party $i$ and $m$ the number of parties

Missing: None.

Source: Own calculations.
5. Institutions

The variables ‘lfirst’ to ‘lbank’ come from Lijphart (2012: 305-309). They concern two dimensions of consensus democracies. The value for the period 1945-2010 is entered in 1960; the value for the period 1981-2010 is entered in 1981. For definition of the variables, see Lijphart (2012). The index of central bank independence (‘lbank’) covers only the periods 1945-1994 and 1981-1994. The first years analyzed vary by country (for further information see Lijphart 2012: 49).

Ifirst  First (executives-parties) dimension
Isec   Second (federal-unitary) dimension
Ieff   Effective number of parliamentary parties
Imin   Minimal winning one-party cabinets (%)
Iexe   Index of executive dominance
Idis   Index of disproportionality (%)
Iint   Index of interest group pluralism
Ifed   Index of federalism
Ibic   Index of bicameralism
Irid   Index of constitutional rigidity
Ijud   Index of judicial review
Ibank  Index of central bank independence

Missing: Bulgaria, Croatia, Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Romania, Slovakia, Slovenia.

Ifirstp Lijphart’s first dimension. Time-variant proxy variable (for details see Appendix 5).
Source: Own calculations.
Period covered:

Ifirstpi Lijphart’s first dimension. Proxy variable institutions (for details see Appendix 5).
Source: Own calculations.
Period covered: See variable ‘Ifirstp’.

Ifirstpb Lijphart’s first dimension. Proxy variable behavior (see Appendix 5).
Source: Own calculations.
Period covered: See variable ‘Ifirstp’.

instcons Index of institutional constraints of central state government according to Schmidt (1996); Minimum value = 0; Maximum value = 6; Range of data: 0 to 5, with high values indicating powerful constraints and low values indicating that the central government has a great deal of room for maneuverability.
Description: additive index composed of 6 dummy variables (‘1’ = constraints, ’0’ = else): (1) EU membership = 1, (2) degree of centralisation of state structure...
Codebook: Comparative Political Data Set, 1960-2014

(federalism = 1), (3) difficulty of amending constitutions (very difficult = 1) (4) strong bicameralism = 1 (5) central bank autonomy = 1 (6) frequent referenda =1.

Period covered:

structur Augmented index of constitutional structures based on Huber/Ragin/Stephens (1993: 728); we turned the time-invariant variable into a time-variant variable by adjusting for institutional changes, e.g. the Belgian shift to federalism in 1993. Countries not covered by Huber et al. (1993) were classified according to Huber et al. using information from national sources or comparative analyses such as Schmidt (1996).

Description: Additive index composed of five indicators: (1) federalism (0 = absence, 1 = weak, 2 = strong), (2) parliamentary government = 0, versus presidentialism or other = 1, (3) proportional representation = 0, modified proportional representation = 1, majoritarian = 2, (4) bicameralism (0 = no second chamber or second chamber with very weak powers, 1 = medium strength bicameralism, 2 = strong bicameralism), (5) frequent referenda = 1.

Missing: None.

Source: Own calculations based on Huber/Ragin/Stephens (1993).

fed Federalism. Coded: 0 = no; 1 = weak; 2 = strong.

Missing: None.

Source: Huber et al. (2004); national sources and constitutions.

Note:
1. Spain is classified as a strong federal state, although formally it is a unitarian one.

pres Executive-legislative relations according to Lijphart (2012: 108ff.). Coded: 0 = parliamentary system; 1 = semi-presidential dominated by parliament; 2 = hybrid system; 3 = semi-presidential dominated by president; 4 = presidential system.

Missing: None.

Source: Lijphart (2012); Huber et al. (2004); Ismayr (2003, 2006, 2010); national sources and constitutions; EJPR Political Data Yearbook (various issues).

Note:
1. In addition to a parliamentary prime minister, a semi-presidential system (= 1 or 3) also has a popularly elected president (Lijphart 2012: 109).
2. Changes are entered in the year of the first (parliamentary or presidential) elections under the new rules.
3. France: During cohabitation France is defined as a semi-presidential system dominated by parliament (= 1), otherwise as a semi-presidential system dominated by president (= 3).
Switzerland: Switzerland is the only system classified as hybrid, since the collegial executive elected by the legislative does not depend on legislative confidence.

Electoral system: single member districts or proportional representation. Coded 0 = single-member, simple plurality systems; 1 = modified proportional representation (parallel plurality PR-systems, majority-plurality/alternative vote); 2 = proportional representation (PR).

Missing: None.

Source: Inter-Parliamentary Union; Ismayr (2003); Lijphart (2012); national sources and constitutions; EJPR Political Data Yearbook (various issues).

Notes:
1. Changes are entered in the year of the first election under the new electoral rules.
2. Countries with generally proportional representation but majority vote in a few districts (e.g. in the Spanish Enclaves Ceuta and Melilla or in the small Swiss cantons with only one representative) are simply counted according to Lijphart (1999) as countries with proportional representation systems.
3. The difference between the mixed member proportional formula and the parallel plurality-PR system (semiproportional formula) is that in the parallel system no compensation exists for any disproportionality produced by the single-member district results.

Index of bicameralism according to Lijphart (2012). Coded 1 = unicameralism; 2 = weak bicameralism (asymmetrical and congruent chambers); 3 = medium strength bicameralism (asymmetrical and incongruent or symmetrical and congruent); 4 = strong bicameralism (symmetrical and incongruent).

Missing: None.

Notes:
1. The term “incongruent” is used when the second chamber is elected by different methods and has the purpose of overrepresenting certain minorities. The term “symmetrical” refers to equal or moderately unequal constitutional powers and democratic legitimacy.
2. Austria and Belgium: In the Austrian Bundesrat and the Belgian Senate, the degree of overrepresentation is so slight that they can almost be regarded as proportionally apportioned chambers. Therefore, they should be classified as congruent with their first chamber (Lijphart 2012: 194).
3. Belgium: With the new federal Constitution of 1994, the lower house received more powers relative to the Senate (Art. 74 Cst.). Since the shared competences (Art. 77) are of fundamental importance for the federal state, Belgium is still considered as having medium-strength bicameralism.
4. Iceland (until 1991) and Norway (until 2009): Both are coded as 1.5 (one-and-a-half chambers), because although the legislators are elected as one body, after elections they divide themselves into two chambers (Lijphart 2012: 189).
5. United Kingdom: The British case is coded as 2.5 (between medium-strength and weak bicameralism) because the upper house is a “relict of a predemocratic era” (Lijphart 2012: 201).

Referendum. Coded 0 = None or infrequent, 1 = frequent.

Missing: None.

Source: Huber et al. (2004); and information from national sources and comparative analyses.
Codebook: Comparative Political Data Set, 1960-2014

Note:
1. While the a body of judicial review has existed in Poland since 1982, until the end of the Small Constitution in 1996, it was subordinate to the parliament (Ziemer/Matthes 2006:236). Therefore, Poland was not considered to have an independent body under the Small Constitution and gets a zero (0) until 1996.
2. Romania: The decision of the Constitutional Court can be overruled by the Parliament: Article 145 [Procedure in Cases of Unconstitutionality], Constitution of Romania, 1991: “(1) In cases of unconstitutionality, in accordance with Article 144 (a) and (b), the law or orders shall be returned for reconsideration. If the law is passed again in the same formulation by a majority of at least two-thirds of the members of each chamber, the objection of unconstitutionality shall be overtur, and promulgation thereof shall be binding.”

6. Openness of the economy

kaopen Index for the degree of openness in capital account transactions. The index incorporates a variable indicating the presence of multiple exchange rates, a second variable indicating restrictions on current account transactions, a third variable indicating restrictions on capital account transactions and a fourth variable indicating the requirement of the surrender of export proceeds. The higher the value, the more open a country is to cross-border capital transactions. The index is normalized to a range between 0 (minimal openness) and 1 (maximal openness). <th>Country</th>
<th>Year 1</th>
<th>Year 2</th>
<th>Year 3</th>
<th>Year 4</th>
<th>Year 5</th>
<th>Year 6</th>
<th>Year 7</th>
</tr>
</thead>
</table>

Notes:
1. Disbursements are transactions of providing financial resources. The two counterparties must record the transaction simultaneously.
2. *Sweden*: From 2000 on, the Church of Sweden has been separated from the state. In terms of national accounts, this causes a reclassification of the Church's activities from the public to the private sector. As a consequence, growth in private consumption in 2000 is higher than it would otherwise have been, while conversely, growth in public consumption is lower. (Source: OECD (2010), "OECD Economic Outlook No. 88", Sources and Methods).

Total receipts (revenue) of general government as a percentage of GDP.
Source: OECD (2016), "OECD Economic Outlook No. 99", OECD Economic Outlook: Statistics and Projections (database) (Downloaded: 2016-07-21). For countries which are not OECD members, namely Bulgaria, Croatia, Cyprus, Latvia, Lithuania, Malta and Romania, data were retrieved from Eurostat (*Government revenue, expenditure and main aggregates*) (Downloaded: 2016-07-21).

8. Ireland 1997: Data is taken from OECD (2014), "OECD Economic Outlook No. 96" (Downloaded: 2015-03-12).
10. Slovenia 1995-2014: Data is taken from Eurostat (see source above).

**deb_hist** Gross general government debt (financial liabilities) as a percentage of GDP. The same data as in the variable "debt" is extrapolated using change rates from IMF historical data and, in a few cases, from Reinhart and Rogoff (2009).

**Period covered:**

Notes:
1. Where available, the data is identical to the variable “debt” (see exact sources above).
2. Where the variable “debt” was missing, change rates from the IMF historical data were used to extrapolate from the values of the variable “debt”. In a few cases, the IMF data contained small gaps. Then, the change rates from the data from Reinhart and Rogoff (2009) were used to interpolate the gaps in the IMF data. The goal of this variable is to preserve the levels of the variable “debt” but maximize the number of observations available.
3. Please note that there are partially grave differences in operationalization between the sources used. E.g., the IMF often reported central government debt when general government debt data was not available. Therefore the researcher should be very careful to consider breaks in the time series.

**deficit** Annual deficit (overall balance / net lending of general government) as a percentage of GDP.

tries which are not OECD members, namely Bulgaria, Croatia, Cyprus, Latvia, Lithuania, Malta and Romania, data were calculated from Eurostat (Government deficit/surplus, debt and associated data) (Downloaded: 2016-07-22).

Interest

Long-term interest rate on government bonds.

Source: OECD (2016), "OECD Economic Outlook No. 99", OECD Economic Outlook: Statistics and Projections (database) (Downloaded: 2016-07-21). For countries which are not OECD members, namely Bulgaria, Croatia, Cyprus, Latvia, Lithuania, Malta and Romania, data were retrieved from AMECO (variable ILN) (Downloaded: 2016-07-22).

Period covered:

Notes:
1. Long-term (in most cases 10 year) government bonds are the instrument whose yield is used as the representative ‘interest rate’ for this area. Generally, the yield is calculated at the pre-tax level and before deductions for brokerage costs and commissions and is derived from the relationship between the present market value of the bond and that at maturity, also taking into account interest payments paid through to maturity (see OECD, Main Economic Indicators: Sources and Definitions).
5. Latvia (entire period): Data is taken from OECD (see source above).
Current account balance as a percentage of GDP. The current account is a record of a country's international transactions with the rest of the world. Source: Eurostat (Main Balance of Payments and International Investment Position items as share of GDP) (Downloaded: 2015-07-01). Data for Australia, Canada, Ireland, Japan (2012/13), New Zealand, Norway, Sweden, Switzerland, United Kingdom and USA were retrieved from OECD (2016), "Key short-term indicators", Main Economic Indicators (database) (Downloaded: 2016-08-08).

</tbody>
</table>

**Note:**  
1. Ideally, the lost working days are set in relation to the dependent labour force (persons employed), so the labour force should be adjusted to unemployed and self-employed persons. Due to limited availability of data on civilian employment, we use the total labour force in the denominator, though. With a few exceptions for most recent years, data on total labour force is available for all countries and years. Using the available data on civilian employment, the correlation between the measure based on civilian employment and the measure based on total labour force is 0.99.

Period covered:
AUT 1985-2011 | FIN 1980-2011 | LVA -- | ROU --

Note:
1. For non-members of the OECD (Bulgaria, Croatia, Cyprus, Latvia, Lithuania, Malta and Romania), Eurostat includes data on some components of active labour market programmes under the function “unemployment expenditure” (variable ‘unemp_pmp’). In order to avoid double inclusion of data on active labour market policies, these countries are coded get missing values. We provide more detailed data on active labour market policies from a different Eurostat source in the section “Labour market policy”, however.

unemp_pmp  Cash expenditure for unemployment benefits as a percentage of GDP (public and mandatory private).
Source: See variable ‘socexp_t_pmp’.

Note:
1. For non-members of the OECD (Bulgaria, Croatia, Cyprus, Latvia, Lithuania, Malta and Romania), we used Eurostat data. However, these Eurostat data on unemployment benefits also include some components of active labour market
programmes. For all other countries (covered by the OECD), data on active labour market programmes are included separately in the variable ‘alm_pmp’.

**housing_pmp**  Total public and mandatory private expenditure on housing as a percentage of GDP.
*Source:* See variable ‘socexp_t_pmp’.
*Period covered:* See variable ‘socexp_t_pmp’. Additional missing values: Belgium 1980-99; Czech Republic 1990-93.

**othsocx_pmp**  Public and mandatory private expenditure on other social policy areas as a percentage of GDP.
*Source:* See variable ‘socexp_t_pmp’.

### 11. Family policy

**Notes on fallow_pmp and onwards:**
1. Please consider that there may be breaks in series.

**fallow_pmp**  Total public and mandatory private cash benefits for family allowances as a percentage of GDP.
*Period covered:*

Notes:
1. Specific requirements for collective dismissals are not included.

emprot_temp

Employment protection strictness provided through legislation and as a result of enforcement processes (scale of 0-6; higher values indicate stricter employment protection). This indicator measures the strictness of regulation on the use of fixed-term and temporary work agency contracts.

Source: See variable ‘emprot_reg’.

Period covered: See variable ‘emprot_reg’.

13. Income inequality

prefisc_gini

Gini index of pre-fisc income (before taxes and transfers) among household members aged 18-64, in percent.

Period covered: 1969-2013. Detailed record on data points covered:

In brackets: data available for variables pretran_gini and postfisc_gini only.

Source: Luxembourg Income Study Database (LIS), www.lisdatacenter.org (multiple countries; calculated from LIS microdata by David Weisstanner on 2016-08-22). Luxembourg: LIS.

Note on prefisc_gini, pretran_gini and postfisc_gini:
1. Incomes refer to household incomes; equivalized using the square root of the number of household members; bottom-coded at 1% of equivalized mean income; top-coded at 10 times of non-equivalized median income.

pretran_gini Gini index of pre-transfer income (after taxes, before transfers) among household members aged 18-64, in percent.
Period covered: See variable ‘prefisc_gini’.
Source: See variable ‘prefisc_gini’.

postfisc_gini Gini index of disposable income (after taxes and transfers) among household members aged 18-64, in percent.
Period covered: See variable ‘prefisc_gini’.
Source: See variable ‘prefisc_gini’.

14. Demographic data

Note on demographic data:
1. Please consider that there may be breaks in series.

pop Total population, in thousands.
Missing: Austria, Denmark, Japan, Netherlands, Portugal, Sweden and Switzerland 2014; Greece 2013/14.

Note:
1. Slovakia: All data are taken from AMECO (see source above).

pop15_64 Population 15-64, in thousands.
Source: OECD and AMECO (variable NPAN) (see variable ‘pop’).

pop65 Population over 65, in thousands.
Missing: See variable ‘pop15_64’.
Source: OECD and AMECO (variable NPON) (see variable ‘pop’).

Appendix

Appendix 1  Notes concerning the variables gov_right, gov_cent, gov_left

All entries were calculated on the basis of Schmidt and Beyer (1992), Woldendorp, Keman and Budge (1998), Ismayr (2003), Keesing’s Archive, European Journal of Political Research, Neue Zürcher Zeitung, People in Power (http://www.circa-uk.demon.co.uk/pip.html), parliaments and governments database (http://www.parlgov.org/explore), Colberg et al. (1998), Casal Bértoa (2016) and the Parline database (http://www.ipu.org/parline-e/parlinesearch.asp). The classification of parties was done according to Schmidt (1996). If there was no classification by Schmidt, we classified parties using the following assignments (see Appendix 2):
- ‘Left’ denotes social democratic parties and political parties to the left of social democrats
- ‘Right’ denotes liberal and conservative parties
- ‘Centre’ denotes centre parties, in particular Christian Democratic or Catholic parties. According to Schmidt (1996: 160), centre parties favor a “moderate social amelioration in a location to the left of conservative or conservative-neoliberal parties.”

Appendix 2  Assignment of governing political parties to left, centre, right

**Australia**
- left  Australian Labour Party *(ALP)*
- centre  ----
- right  Liberal Party *(LIB)*
  Country National Party *(CNT)*

**Austria**
- left  Socialist Party *(Sozialdemokratische Partei Österreichs, SPÖ)*
- centre  People’s Party *(Österreichische Volkspartei, ÖVP)*
- right  Freedom Party *(Freiheitliche Partei Österreichs, FPÖ)*

**Belgium**
  Francophone Socialist Party *(Parti Socialiste, PS)*
  AGALEV (Greens, francophone)
  ECOLO (Greens, flemish)
  Democrat Humanist Centre *(Centre Démocrate Humaniste, CDH)* (until 2002: Christian Social Party (PSC))
  Francophone Democratic Front (DFD)
  New Flemish Alliance *(Nieuw-Vlaamse Alliantie, N-VA)* (former: Flemish/People’s Union (VU))
  Democratic Union (DU)
  Wallon Rally (RW)
Codebook: Comparative Political Data Set, 1960-2014

- right Liberal Party (LP)
  Open Flemish Liberals & Democrats (Vlaamse Liberalen en Democraten, Open VLD) (former: Party of Liberty and Progress (PVV))
  Reform Movement (Mouvement Réformateur, MR) (former: Francophone Liberal Reform Party (PRL))
  Movement of Citizens for Change (Mouvement des citoyens pour le changement, MCC)

Bulgaria
- left Bulgarian Socialist Party (Bulgarska Socialističeska Partija, BSP)
  Coalition for Bulgaria (Koalitsiya za Bulgaria, KB)
- centre Democratic Party (Demokraticheska partia, DP)
- right Coalition Movement for Rights and Freedoms (Dviženie za Pravata i Svobodie)
  [formed of Movement for Rights and Freedoms (Dviženie za Pravata i Svobodie); Liberal Union (Liberalen Sajuz) and Euroroma (Evroroma)]
  National Movement Simeon II (Nacionalno Dvisenie Simeon Tvoi, NDSV)
  Union of Democratic Forces (Sil Demokratic Sajuz, SDS)
  Citizens for European Development of Bulgaria (Grazhdani za Evropeisko Razvitie na Bulgaria, GERB)
  Reformist Bloc (Reformatorski blok, RB)

Canada
- left -------
- centre Liberal Party (LIB)
- right Progressive Conservative Party (PC)

Croatia
- left Social Democratic Party of Croatia (Socijaldemokratska Partija Hrvatska, SDP)
- centre Croatian Democratic Union (Hrvatska Demokratska Zajednica, HDZ)
  Croatian Peasant Party (Hrvatska Seljačka Stranka, HSS)
- right Croatian Social Liberal Party (Hrvatska Socijalno Liberalna Stranka, HSLS)
  Croatian People’s Party (Hrvatska Narodna, HNS)
  Party of Liberal Democrats (LIBRA)
  Democratic Center (Demokratski Centar, DC)
  Istrian Democratic Assembly (Istarski Demokratski Sabor, IDS)
  Liberal Party (Liberalna Stranka, LS)
  Independent Democratic Serb Party (Samostalna demokratska srpska stranka, SDSS)

Cyprus
- left Social Democrats Movement (Kínima Socialdemokraten, KISOS), former EDEK (United Democratic Union of Cyprus, The Socialist Party).
- centre -------
- right The Democratic Rally (Demokratikos Synagermos, DISY)
  The Democratic Party (Demokratiko Komma, DIKO)
  Free/United Democrats (Enomenoi Democrats, EDI)
  Liberal Party
  European Party (Evropaiko Komma, EVROKO)
Czech Republic
- left  Czechoslovak Party of Social Democracy (Česká strana sociálne demokratická CSSD)
  Green Party (SZ)
- centre  Christian Democratic Union - Czechoslovak People's Party (Kresianskaa a Demokraticka Unie – Československá Strana Lidová, KDU-CSL)
- right  Civic Democratic Party (Obcanska Demokraticka Strana, ODS)
  Union of Freedom/Democratic Union (Unie Svobody/Demokraticka Unie, US/DEU)
  Democratic Union (Krestanka a Demokraticka Unie/Ceskoslovenska Strana Lidova. KDU/CSL – Unie Svobody/Demokraticka Unie, US/DEU) [christian democrats and liberals]
  Civic Democratic Alliance (Obcanská demokratická alliance, ODA)
  TOP 09 (TOP 09)
  Public Affairs (Věci veřejné, VV)
  LIDEM-Liberal Democrats (LIDEM – liberální demokraté)
  Action of Dissatisfied Citizens (Akce nespokojených občanů 2011, ANO)

Denmark
- left  Social Democrats (Socialdemokratiet, SD)
  Left Socialist Party (LSP)
  Socialist People's Party (Socialistisk Folkeparti, SF)
- centre  Centre Democrats (Centrum Demokraterne, CD)
  Christian People's Party (Kristendemokraterne, KRF)
- right  Liberals (Venstre, LIB)
  Conservative People's Party (Det Konservative Folkeparti, KF)
  Justice Party
  Radical Party (Social Liberal Party) (Det RadiKale Venstre, RV)

Estonia
- left  Social Democratic Party (SDE) [Formerly: Moderates (Mõõdukad) [merger of People's Party (Estonian Social Democratic Party + Rural Centre Party) with Moderates; from 1999 known as the People's Party Moderates (Rahvaerakond Mõõdukad)]
  KMU - Estonian Coalition Party (Eesti Koopererakond, EK) and Rural Union (Eesti Maalit, EM)- [formed from Estonian Coalition Party (KE or KMU-K), Estonian Rural Union (EM or KMU-M), Estonian Country People's Party (EME), Estonian Pensioners' and Families' League (EPPL) and Farmers' Assembly (PK)]
- centre  Estonian Centre Party (Eesti Keskerakond, EK)
- right  Homeland (Isamaa) until 1999; in 1999 merged with Pro Patria and formed Homeland - Pro Patria Union (Isamaallit)
  Estonian People's Union (Rahvusliit)
  Estonian Reform Party (Eesti Reformierakond, RE)
  Estonian National Independence Party (Eesti Rahvusliku Sõltumatuse Partei, EERP)
  Pro Patria and Res Publica Union (Isamaa ja Res Publica Liit, IRL) [merger of Res Publica and Pro Patria Union]

Finland
- left  Social Democrats (Suomen Sosialidemokraattinen Puolue, SDP)
  Finnish People's Democratic Union (SKDL)
Social Democratic League (TPSL)
Left-Wing Alliance (Vasemmistolitto, VAS)
Green League (Vihreä Liitto, VIHR)

- centre
  Centre Party (Keskusta, KESK)
  Liberal People’s Party (LKP)
  Christian Democrats (Kristildemokraatit, KD) (former Christian League, SKL)
  Finnish Rural Party (Suomen Maaseudun Puolue, SMP) (SMP)

- right
  National Coalition (Kansallinen Kokoomus, KOK)
  Swedish People’s Party (Svenska Folkepartiet I Finland, SFP/RKP)

France

- left
  Socialist Party (Parti Socialiste, PS)
  Communist Party (Parti Communiste Français, PCF)
  Greens (Les Verts)
  Movement for Citizens (Mouvement des Citoyens, MDC)
  Generation Ecology (Génération Écologie, GE)

Japan

- left
  Social Democratic Party (SDP) (Shakai Minshuto)
  Japan Communist Party (JCP) (Nihon Kyosanto)
  Democratic Socialist Party (Minshu Shakaito)
  United Democratic Socialists (UDS)

- centre
  Clean Government Party (CGP) (Komeito)
  Democratic Party of Japan (DPJ) (Minshutō)

- right
  Liberal Democratic Party (LDP) (Jiyu Minshuto)
  New Liberal Club (NLC)
  Japan Renewal Party (JRP)
  Japan New Party (JNP) (Nihon Shinto)
  New Conservative Party (NCP) (Hoshu Shinto)
  Liberal Party (LP)
  People’s New Party (PNP)
  (New) Sakigake Party (NPS)

Note:
According to its party manifesto, the Democratic Party of Japan (DPJ) is a centre-left party. Since it is more to the centre than to the left, we classified it as ‘centre’ with regard to the party composition of government. However, for the ‘elections’ variables, we assigned this left-liberal party to the socialist party family (‘social’) which includes both traditional social democratic parties as well as blends of social-democratic and liberal parties.

Latvia

- left
  Democratic Centre Party (since 1995, Democratic Party "Master" (DPS Saimnieks))
  Latvian Social-Democratic Alliance (Latvijas Sociāldemokrātu Apvienība, LSDA)

Appendix 3  Notes concerning votes and seats of political parties in national parliaments (lower houses in bicameral systems)

As a general rule we included data on votes and seats for a party if it reaches at least 2% of votes in an election. If a party did not reach that threshold, data for this party is not included for that election (neither on votes nor on seats) and it receives a zero.

For example, the only Liberal Party in country X has 1991: 1.7% (votes), 2.0% (seats); 1994: 2.0% (votes), 1.7% (seats); 1998: 5.0% (votes), 4.5% (seats); 2000: 0.9% (votes), 0.8% (seats). The data entered for the Liberal Party are therefore:

votes:  
liberal1  slibera1
1991: 0  1991: 0
1994: 2.0  1994: 1.7
2000: 0  2000: 0

Our classification of party families started from the work by Lane, McKay and Newton (Lane et al. 1997), which distinguishes between 11 party families. We added a party family ‘right-populist parties and ultra right parties (“right”)’ which includes all the ultra-right parties according to Lane, McKay, Newton and right-populist parties according to the definition of populist radical right parties by Cas Mudde (2007: 22-3). Three features distinguish these parties from other parties: Nativism, authoritarianism and populism. Examples are given in Mudde (2007: 44) and Mudde (2013: 3). For Central and Eastern European countries, Janusz Bugajski (2002) was the main source for labelling, combined with additional national sources. As often acknowledged in the literature, parties in these areas frequently do not have a clear ideological stance, therefore their placement in distinct categories is not a straightforward process. For the sake of clarity, we made a tentative assignment of parties.

The national parties in a given family of parties were given consecutive numbers. If, for example, there are three political parties in the socialist spectrum of the party system, they were given the names social1, social2, and social3. The share of votes and seats were entered under these variable names for each party. This structure of the data set allows for various re-classification and aggregations.

If there is no party for a given variable, ‘0’ is entered. For example, since the United Kingdom has no agrarian party, the variable ‘agrarian’ has the value ‘0’ in the case of the United Kingdom. The share of votes are entered under the party variable name. The share of seats are entered under the party variable name, preceded by an ‘s’ (for ‘seats’). For example, in the
case of Australia under ‘social1’ votes for the Australian Labour Party are entered; the variable ‘ssocial1’ denotes share of seats of the Australian Labour party.

In cases where data on votes are not available for parties separately due to electoral alliances we apply the following coding rules.

- If one party of the electoral alliance received more than 75% of the seats won by the electoral alliance, the total vote and seat share won by this alliance is entered under the variable name of this major party.
- If no party of the electoral alliance received more than 75% of the seats won by the electoral alliance, the total vote and seat share won by the alliance is entered under a new variable. If the alliance is not ideologically consistent we entered the corresponding values under the party family “allia”.

The variable ‘protest’ refers to protest parties. We were restrictive in using this variable, since parties emerging as protest parties often change to a programmatic category, e.g. the German Green party. Thus we may apply retrospective changes if parties fit better into other categories. More recently, the ‘protest’ category may also comprise parties with EU-sceptic orientation, but without the nativism associated with the category ‘right’.

The variable ‘others’ refers to the percentage of total votes for all minor parties which received less than 2% of total votes each or for independent candidates. The variable ‘sothers’ refers to the percentage of total seats in parliament for all minor parties which received less than 2% of total votes or for independent candidates. Therefore, the variables on both votes and seats add up to 100%.

Due to a more complex party structure in post-communist countries, some other categories were added to the classification of Lane/McKay/Newton (1997), which only accounts for post-communist countries (see note on table below).

“Non-label” (nonlbl) is a residual category for those parties which could not be placed in any of the categories above. The “personalist” (person) label is used to designate parties created to support one candidate and which cannot be assigned an ideological label. “Pensioners” (pension) is a category comprised of parties of pensioners and persons with special needs. The “conservative” (conserv) label is used for party programs which emphasize both nationalist and religious values. The maximum number of variables is a result of the maximum number of parties within the family which reached at least 2% of the votes in an election in at least one country.

There is one major problem with these classifications: The classification is time-invariant. Some parties, however, changed their programs, goals and clienteles considerably over time. We do not adapt the classification to such changes systematically. However, in those cases where we are aware of major changes, we re-classified the party for the period after the change. Examples are the Swiss Peoples Party (SVP) or the Austrian Freedom Party (FPÖ). Both parties had been re-classified due to their change from an agrarian (SVP) or liberal (FPÖ) to a right populist party. Based on the literature we identified the years 1995 for the SVP and the year 1986 for the FPÖ as the time point when they switched from agrarian and liberal, respectively, to right-populist.

We recommend that users of the data set carefully consider whether our classifications fit their conceptual perspective and re-classify according to their needs.

### Appendix 4 Assignments of political parties in parliaments to party families

If there are numbers assigned to parties in the following list, they represent the identification numbers found in Mackie and Rose (1991).

#### Australia
- **social1** 1) Labour Party (ALP)
- **social2** 21) Democratic Labour Party
- **agrarian1** 7) Country Party, National Party
- **conserv1** 18) Australian Liberal Party
- **conserv2** --- One Nation
- **conserv3** --- Family First
- **liberal1** 27) Australian Democrats
- **liberal2** 23) Australia Party
- **liberal3** --- Palmer United Party (PUP)
- **green1** --- Australian Greens

#### Austria
- **social1** 1) Socialist Party (SPÖ)
- **comm1** 5) Communist Party (KPÖ)
- **relig1** 2) People’s Party (ÖVP)
- **liberal1** 11) Freedom Party (FPÖ) (since 1986: right1)
- **liberal2** 17) Liberal Forum (LIF)
- **liberal3** --- The New Austria and Liberal Forum (NEOS)
- **liberal4** --- Team Frank Stronach (TS)
- **protest1** 12) Democratic Progressive Party
- **protest2** --- List Dr Martin – For Democracy, Control and Justice (Martin)
- **green1** 15) Green Alternative
- **right1** 11) Freedom Party (FPÖ) (until 1985: liberal1)
- **right2** --- Alliance for the Future of Austria (BZÖ)

#### Belgium
- **social1** 3) Socialist Party (since 1977 split into 30 and 31)
<table>

</tr>
</thead>
</table>

- **social3** 31) Francophone Socialist Party (PS)
- **comm1** 10) Communist Party (KPB/PCB)- **comm2** --- Workers’ Party of Belgium-Left Opening! (PTB-GO!)
- **reli1** 1) Catholic Party (since 1965 split into 19 and 20)
- **reli3** 20) Humanist Democratic Centre (CDH) (until 2002: Francophone Christian Social Party (PSC))
- **liberal1** 2) Liberal Party (since 1971 split into 21 and 22)
- **liberal2** 21) Open Flemish Liberals & Democrats (Open VLD) (until 2007: Flemish Liberals & Democrats (VLD); former: Flemish Party of Liberty and Progress (PVV))
- **liberal3** 22) Reform Movement (MR) (former Francophone Liberal Reform Party (PRL); in 1995: Alliance with FDF; in 1999: Fédération PRL-FDF-MCC) (Francophone)
- **liberal4** --- Vivant (joined the VLD in 2007)
- **liberal5** 5) Liberal/Socialist cartels
- **liberal6** --- De Decker’s List (LDD)
- **protest1** 32) ROSSEM/ROSSUM
- **green1** 26) ECOLO (Francophone)
- **green2** 27) Green (Flemish) (former: AGALEV)
- **ethnic1** 8) New Flemish Alliance (N-VA) (former Flemish/People’s Union (VU))
- **ethnic2** 14) Francophone Democratic Front (FDF)
- **ethnic3** 18) Walloon Rally
- **right1** 28) Democratic Union for the Respect of Labour (UDRT/RAD)
- **right2** 33) National Front (FN-NF) (Francophone)
- **right3** 29) Flemish Interest (since 2004: Flemish Block)

**Bulgaria**
- **social1** Democratic Alternative for the Republic (Demokratichna Alternativa za Republika, DAR)
- **social2** Coalition for the Democratic Left [comprised of Bulgarian Socialist Party (Bulgarska Socialisticheska Partiya); Bulgarian Agrarian People’s Union - Alexander Stamboliski (Bulgarski Zemedelski Naroden Sajuz - Aleksander Stambolijski) and PC "Ecoglasnost"]
- **social3** Coalition Euroleft (Bulgarska Evrolevitsa)
- **social4** Alternative for Bulgarian Revival (Alternativa za balgarsko vazrazhdane, ABV)
- **leftsoc1** Coalition for Bulgaria (Koalicija za Bulgarija) [comprised of Bulgarian Socialist Party, "Social Democrats" Political Movement, United Labour Block, Bulgarian Agrarian Union "AI. Stamboliyski - 1899", Union for the Fatherland, Social-Liberal Progress Alliance, "Forward Bulgaria" Movement, Communist Party of Bulgaria, "Trakiya" Political Club, "Roma" Civil Alliance]
- **postcom1** Bulgarian Socialist Party (Bulgarska Socialističeska Partija BSP)
- **agrarian1** Bulgarian National People’s Union - official (Bulgarski Zemedelski Naroden Sajuz BZNS)
- **agrarian2** Bulgarian National People’s Union - United (Bulgarski Zemedelski Naroden Sajuz - O, BZNS-O)
- **agrarian3** Bulgarian National People’s Union - Nikola Petkov (Bulgarski Zemedelski Naroden Sajuz - Nikola Petko, BZNS-NP)
- **conserv1** Citizens for European Development of Bulgaria (Grazhdani za Evropeisko Razvitie na Bulgaria, GERB)
- **conserv2** Order, Law and Justice (Red, Zakonnost I Spravedlivost, RZS)
Codebook: Comparative Political Data Set, 1960-2014

- conserv3 Democrats for Strong Bulgaria and Bulgarian Democratic Forum (Demokrati za Silna Bulgaria i Bulgarski Demokratichen Forum, DSB-BDF)

- right2 42) Northern League (formerly Lombard League)
- allia1 2001: La Margherita (PPI, the Democrats, Italian Renewal, UDEUR)

**Notes:**

1994: Introduction of a new electoral system. 474 MPs of 630 are elected on the basis of a “single-ballot first-past-the post system”; the remaining 156 seats are distributed on the basis of a “proportional formula” (EJPR 1995: 398). Data on votes refer to the (proportional) list votes, data on seats refer to the total of seats gained by the party (proportional plus plurality system). However, by the end of 2005, a party-list proportional representation system was re-introduced.

**Japan**

- social1 35) Social Democratic Party (Socialist Party) (SDP)
- social2 44) Democratic Socialist Party (DSP)
- social3 --- Democratic Party of Japan (DPJ)
- comm1 31) Japanese Communist Party (JCP)

- liberal2 --- Your Party (YP)
- liberal3 --- Japan Innovation Party (JIP)
- green1 --- Tomorrow Party of Japan (TPJ)
- right1 --- Japan Restoration Party (JRP)
- right2 --- Party for Future Generations (PFG)

**Notes:**

1996: Introduction of a new electoral system. 300 of 500 MPs (since 2014, 295 of 475) are elected in “single-seat constituencies with non-transferable single ballot and simple plurality”, the remaining 200 (180, since 2000) seats are distributed according to “proportional representation” (EJPR 1995: 412). Data on votes are arithmetic means of votes in both systems. For example: LDP received 38.6% of votes in single-seats constituencies and had 32.8% in the proportional system. The arithmetic mean is: 

\[(38.6 \times 300/500) + (32.8 \times 200/500) = 36.28 = 36.3.\]

Appendix 5  Notes concerning the variables for consensus democracy

lfirstp: Lijphart first dimension. Proxy variable.

This variable is a time-variant proxy for Lijphart’s first dimension ‘parties-executives’. The data is composed of the moving averages of 10 years of four indices:

- The number of effective parties in parliament (effpar_leg).
- The absence of minimal winning and single-party majority cabinets (calculated from gov_type with (1) single-party majority government and (2) minimal winning coalition coded as ‘0’, otherwise ‘1’).
- The proportionality of electoral systems (variable dis_gall multiplied by [-1]).
- A measure for cabinet dominance, calculated by taking the average cabinet duration (see Lijphart 1999: 129-134), which we measured by the number of changes in government per year (gov_chan).

For example, the value of effpar_leg for 1969 in our calculations is the arithmetic average for the annual data of effpar_leg for 1960-69, the value for 1970 is the average for the period 1961-70, etc.

These moving averages of the four indices were z-standardized and added up. The sum was again z-standardized, which yields the value of the proxy variable. For example, the data entered for 1969 is the z-standardized sum of the z-standardized moving averages for the years 1960-69.

The z-standardization was done across nations for each time point. For example, the z-scores for number of effective parliamentary parties in 2009 were calculated on the basis of the data for the 36 countries in 2009.

We deliberately did not include the index of interest group pluralism, which in our view does not measure the extent of compromise and negotiation between political elites on the level of parliaments and parties. It rather taps dimensions of corporatism and varieties of capitalism.

In order to measure the fit of this proxy variable with Lijphart’s original variable, we correlated the mean of lfirstp for the years 1981 to 2010 with lfirst in 1981 (i.e. Lijphart’s first dimension measured for the years 1981 to 2010). The correlation is 0.902 (significant at p<0.001, n=24).

lfirstpi: Lijphart first dimension. Proxy variable institutions.
lfirstpb: Lijphart first dimension. Proxy variable behavior.

Lijphart has been criticized for mixing up the effects of societal cleavages (such as the number of parties) and institutions (such as electoral rules) with elite behavior such as coalition building and cabinet dominance (Ganghof 2005). Therefore we calculated separate proxy variables both for institutions (lfirstpi) based only on the variables ‘number of parties’ and ‘electoral disproportionality’ and for behavior (lfirstpb) based only on the variables ‘cabinet dominance’ (as measured in lfirstp) and ‘absence of minimal winning coalitions and single-party majority governments’. The calculation as z-scores of moving averages is the same as with regard to lfirstp.

The arithmetic means for the period 1969 to 2014 of lfirstp are correlated with the means of lfirstpi 0.794 and with the means of lfirstpb 0.808; both correlations are significant at p<0.001 (n=36). The correlation between the means of lfirstpi and lfirstpb (1969-2014) is 0.284 and not significant at p<0.05 (n=36).
